Profile

I'm a dedicated and skilled Front-End Developer with a strong passion for creating outstanding user experiences through cutting-edge web technologies. Over the course of my career, I have honed my skills by working on various projects, each contributing to my expertise in React.js and frontend development. I am driven by a desire to continually learn and collaborate with talented teams to deliver exceptional projects and elevate my abilities to new heights.

Education

Bachelor degree in Agriculture Engineering
Ain-Shams University
2022 | Cairo, Egypt

Skills

- C++ , Problem Solving , HTML5 , CSS3 , Sass , JavaScript (ES6+) , Bootstrap , jQuery , Ajax , React.js , Redux , GitHub

Projects

Menu , Display Menu Calls

I built a React-based app with user authentication that allows users to view the menu, call the waiter, and check their location within the restaurant. If the user is inside the restaurant premises, the app displays buttons to request table service. Waiter calls and table requests are shown in another app for the restaurant staff to manage efficiently. <https://tijarymenuclouddemo.azurewebsites.net/?table=26>

Ecommerce Website

I conceptualized and developed an ecommerce website, to provide a seamless online shopping experience for customers. The website was built from scratch using modern web technologies, offering a wide range of products across different categories.

Work Experience

Front-End Development Diploma, At Route Academy

December 2022 – April 2023 | Cairo, Egypt

Intensive training in HTML, CSS, JavaScript, and responsive web design. Specialized in React.js and Redux for building interactive user interfaces.

Hands-on experience in creating responsive and user-friendly websites.

Proficient in translating design mock-ups into functional web pages.

Stayed updated with the latest front-end development trends.

Front-End Developer at bedab Software

May 2023 | Cairo, Egypt

Collaborated with the development team to build and maintain front-end components and features for web applications.

Led the development of the app menu using React, incorporating dynamic navigation links, a collapsible sidebar, and a responsive header bar with search functionality, ensured seamless integration with the back-end system for a smooth user experience.
